

The experience in Switzerland

The time we had in Switzerland was a really wonderful time, the 5 days we had were unforgettable. For us it was a great chance to visit and see Switzerland from near, to get to know her and her culture. Everything about this organization was beautiful, especially the beauties of nature and the time we spent with the host families and the other students that for us they became good friends really fast. The host family was really nice and I thank them very much for everything, the respect they had for me and the love they showed that made me feel like home and not miss anything. The time that I spent with them taught me many things about food and Swiss culture, some things were new but the people were really nice to us and were very friendly. Their hospitality amazed us and we thank them very much that they treated and respected us that much and they became new friends that we will never forget. Except we learned many new things about Switzerland and its places we also had a lot of fun and spent a great time. Everything was perfect starting from the trips, the food, the school, the people, the loving teachers and the whole organization. The moments there are unforgettable and sometimes really funny like the snowball fight, tiring walking but pretty, multiple pictures from Mr. Stüssi and the tireless countings of Klaus, made us love Switzerland and miss her so much. This trip and the great time we had can't be described in words, and the chance we got to learn more. The best of this is the friendship with the other students, a friendship that we created and it is going to continue still. We thank you from our heart and we will miss you so much.
